

What's New in SmartCity® for 2007 Contactless, Modular, Web based System

SmartCity® version 6

SmartCity, the market leading smart card system, has been redeveloped to take advantage of the latest in design technology and rapid application and deployment environments.

SmartCity® version 6 enables SmartCentric Technologies International Ltd (SmartCentric) to offer our customers a far more flexible system, easily customizable, highly reliable and much more user friendly.

In addition, there will be a reduced requirement for hardware and a simple deployment and card issuing application. New customer cards, POS terminals, vending machines, servers and applications can be introduced more easily and quickly.

By adopting latest Windows and Microsoft .NET technologies, SmartCentric can more rapidly respond to changes in market and customer demand and be ready to adapt to new and emerging technologies or applications.

Key Features of SmartCity® 6

- Centralized processing and security offers reduced costs for card issuing
- Easy to configure, deploy and manage services, offering increased ease of use for off-campus and city card program
- Transaction processing and collection improved – more information with less effort
- The Web based interface allows for easier development of customer portals and access to individual reports
- Better administration tools allow for easy system management
- Ability to update card information and applications in the field
- Improved System Reporting
- New infrastructure supports smaller issuers
